

### TOWARDS A PAN-EUROPEAN DIGITAL INNOVATION HUB FOR PERFORMING ARTS

DIGITAL on STAGE is moving towards the development of a pan-European Digital Innovation Hub, an initiative designed to strengthen connections, encourage knowledge exchange and support digital innovation across the performing arts sector.

The Hub is part of the project's broader commitment to fostering collaboration and exploring new opportunities for artists and cultural professionals in an increasingly digital environment.

#### **BUILDING A PAN-EUROPEAN DIGITAL INNOVATION HUB**

The Digital Innovation Hub aims to create a space for collaboration and networking among professionals working in the performing arts across Europe.

By bringing together different stakeholders from the cultural and creative sectors, the initiative seeks to facilitate communication, encourage the exchange of experiences and strengthen connections between professionals working with digital technologies.

Its development reflects the project's ambition to establish a lasting framework for European cooperation and innovation.

#### **WHAT'S NEXT?**

The preparation of the Digital Innovation Hub is part of the project's ongoing work to share knowledge, strengthen professional networks and support the future of digital performing arts in Europe.

As the project progresses, the Hub is expected to provide a framework for continued dialogue and collaboration among European cultural professionals.

#### **CONNECTING ARTISTS AND CULTURAL PROFESSIONALS**

One of the central objectives of the Hub is to facilitate connections between artists, cultural organisations, programmers and other professionals in the performing arts ecosystem.

Through networking and knowledge exchange, the Hub aims to encourage dialogue around digital practices and create opportunities for new collaborations.

It also seeks to support the sharing of experiences and expertise, helping cultural professionals explore new approaches to artistic creation, production and presentation.
